

THEMBA DRY SKIN CREAM

THEMBA Dry Skin Cream is terrific for treating psoriasis.

It is a combination of the active ingredient from the African Kigelia or sausage tree – a known remedy for skin problems – with antiseptic lavender and soothing aloe.

Apparently, themba means “hope” to the Shona and N'Debele tribesmen whose healers or witch doctors created this healing mix.

Over here, the formula has won a huge following because it gets rid of

troublesome skin problems including eczema, itchy dry skin and angry spots.

Themba is produced by The Little Herbal Company which recommends you apply it to the affected area twice daily.

You do not need to use very much and you will be amazed how quickly the skin starts to heal.

I use it last thing at night and first thing in the morning.

A 30mg pot costs £11.95. Get it via mail order on 01484 685100.
